

Begriff **Consent to Non-Consent**

Consensual non-consent, i.e., consent to non-consent.

Image not found or type unknown

Bottom consciously agrees in advance that Top alone will determine the actions and boundaries in the future, even without consent. This goes hand in hand with a waiver of the bottom's right to have a say. In a DD relationship, the man determines the rules and also the corresponding punishments for offenses without Bottom having to agree to them. The possibility of termination is deliberately omitted. Top can therefore carry out or continue a punishment without mutual consent.
